DETAILED ACTION

Specification

The objection to the specification, outlined in the 9/11/02 Office Action, is withdrawn. The holes in the specification on pages 2, 4, 6 and 9 do not obscure entire words and the claim text is legible. However, in the interest of a clear record, the words which are partially obscured by the holes are listed below in their entirety:

Page 2, ...cumene...presence....

Page 4, ...environmental...costs....

Page 6, ...nucleating...solid....

Page 9, ...solutions...pipelines....

112 Rejections Withdrawn

The rejection of claims 20-27 under 35 USC 112, second paragraph, outlined in the 9/11/02 Office Action, has been overcome by applicant's amendment. The amendment cancels the claims.

102 Rejections Withdrawn

The rejection of claims 15-19 under 35 USC 102(b), outlined in the 9/11/02 Office Action, has been overcome by applicant's amendment. The amendment cancels the claims.

Allowable Subject Matter

Claims 1-14 are allowed. The following is an examiner's statement of reasons for allowance:

The closest prior art appears to be applicant's admission that the industry standard practice, based on federal regulations, of preparing CHP for transport is dilution with cumene (page 1, line 24). The art appears to neither teach nor suggest dilution with water. Nor would it appear to have been obvious to one of ordinary skill in the art at the time of invention to modify the prior art method in order to arrive at that of the instant invention. There is no motivation to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
